

KUSHAL KUMAR

Product Designer (UI/UX)

Ghaziabad, Delhi NCR, India | +91-8171035379 | kushal.ux@outlook.com | [Portfolio](#) | [LinkedIn](#)

15+ Enterprise Clients • ₹25L Revenue Driven • 3 Product Surfaces Shipped (Web • Mobile • Embedded) • 10+ Component Design System

PROFESSIONAL SUMMARY

Product Designer with 1 year of experience designing end-to-end digital products, from user research through shipped, revenue-generating features. As a sole designer, owned every surface of a B2B SaaS platform — web, mobile, and embedded hardware — from zero to one. Skilled in information architecture, design systems, usability testing, and translating ambiguous problems into interfaces used daily by non-technical end users. Comfortable working directly with founders, engineers, and cross-functional stakeholders in fast-moving, resource-constrained teams.

EXPERIENCE

Vayu Guard — Product Designer

Aug 2025 – Present

Delhi, India

- Sole product designer for Vayu View, a B2B SaaS air quality intelligence platform — owned end-to-end design across web dashboard, mobile app, and embedded hardware GUI from zero to one, partnering directly with the CMO and a 3-person engineering team.
- Drove product adoption by 15+ enterprise clients across real estate, IT, hospitality, and commercial property, underpinning ₹25L in platform revenue.
- Led on-site field research and stakeholder interviews with building administrators to uncover workflow gaps; translated findings into an information architecture that reduced client support tickets after launch.
- Designed a live web dashboard that collapses a multi-level property hierarchy (portfolio → building → floor → zone → device) into a single actionable view, helping administrators identify issues in seconds.
- Designed a companion mobile app centered on real-time alerts for administrators working on the move, and a glanceable on-device GUI for physical air quality monitors, understood by non-technical occupants in under two seconds with no training.
- Built and maintained a 10+ component, token-based design system as sole author, standardizing severity states (good / degrading / bad / stale / offline) across three surfaces and streamlining handoff for a single-engineer dev team.

SKILLS

Design & Research: Product UX/UI Design, Information Architecture, User Research, Usability Testing, Heuristic Evaluation, A/B Testing, Metrics-Driven Design

Systems & Prototyping: Design Systems, Rapid Prototyping, AI/LLM-Driven Design (Claude Code, Claude Sonnet, Claude Opus)

Collaboration: Cross-Functional Collaboration, Stakeholder Management

Tools: Figma, Blender 3D, Adobe Premiere Pro, CorelDRAW, Claude, ChatGPT

EDUCATION & CERTIFICATIONS

Bachelor of Commerce (B.Com), Final Year

Expected 2026

Subharti University, Meerut

Google UX Design Professional Certificate — Coursera

Feb 2024

User Experience Certification — Accenture

Apr 2024
